## PONSSE ACTIVE SEAT

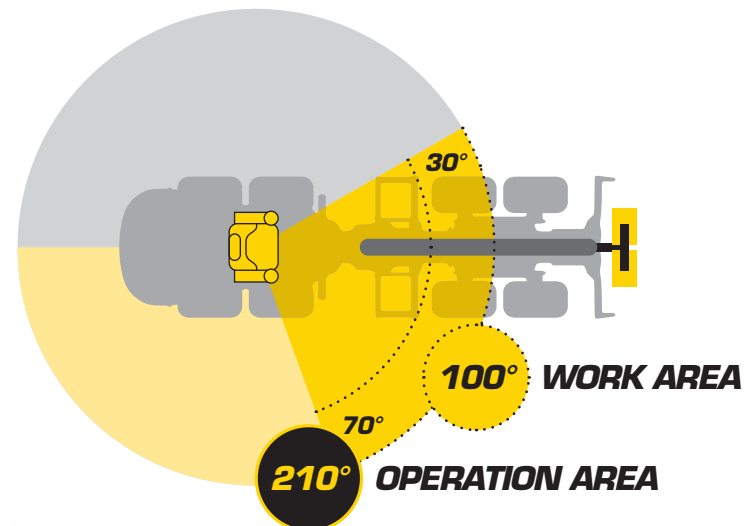

# FIRST-CLASS CONVENIENCE

PONSSE Active Seat provides a full view straight on the job, at all times. It accomplishes this through technology where the operators seat automatically follows the tip of the loader while working. This results in a lot less head movement which significantly contributes to both driver well-being and operating efficiency.

The automatic rotation function covers the entire 100-degree working area. In addition, the operator can manually control the seat: this increases rotation span to 210 degrees, enabling convenient driving to the roadside.

Thanks to our advanced technology, only the seat needs to rotate to keep track of the loader. Should the entire cab have to rotate, a lot heavier burden would be put on the forwarder's structure. In addition, it enables having a larger cab for improved operating convenience and better look at all directions.

PONSSE Active Seat is available as an option on any PONSSE forwarder that is equipped with PONSSE Active Crane.
